

## Progress Report of Arifa Aktar

Dear Scholars Committee,

Oslo International Rotary Club (OIRC),

I hope you are well. I am writing to share my academic progress as a Rotary scholar. My name is **Arifa Aktar**, and I am currently enrolled in the **Level-4, Semester-2** in the Faculty of Veterinary Animal and Biomedical Sciences at Sylhet Agricultural University, Sylhet-3100, Bangladesh. My result of last semester Level 3, Semester 2, was CGPA 3.262 . As recently I finished my Level-4 semester-1, it's result is not published yet.

I got my first fund in august 2023 as a scholars of ORIC 2023 Scholarship program.

### **Achievements:**

On World Veterinary Day, our university's faculty organized a seminar, and I actively participated as a volunteer. Our faculty also arranged the 1st and 2nd Bangladesh Veterinary Olympiads, in which I took part.

I volunteered at a number of animal health and welfare programs that our university was hosting. The medicine department of our university started a community project last level-3 semester-1 to treat livestock animals and offer free vaccinations. Vaccinating thirty-plus animals was part of that effort that I participated in.

I used my course and club activities to spread knowledge about parasite control, deworming, preventing zoonotic diseases, and proper livestock management. I also gathered data and samples for the parasitological department's research.

In addition to all of these, I'm also a sportsman and a Rover scout. I actively participated and represented my university in many inter-university sports events. Also as a rover, I always volunteer in the seminars and conferences that are held in my university. On many occasions and at many events I volunteered to convey programs, like on the 3rd of September this year, when I was the hostess for my own batch.

As a Pradhikar members, we occasionally planned vaccination and deworming campaigns for stray animals as well as food distribution for homeless animals. Moreover, we treated damaged animals with the care they needed after saving them. Every now and then we go for vaccination of street dogs and cats in our surrounding area, like in Sylhet, and also in my hometown in Kishoreganj.

Every Eid and Puja vacation I go to my village, where many people around my house come to me with their sick cattle, poultry, and pets to seek advice from me, as they know I am studying to be a vet in the future. I try my best to help them to my knowledge, and if I get stuck anywhere, I ask for help from my professor or campus senior to help guide them through their problems. It helps me to learn and be a good practitioner and vet for the future as well as to help my village people and their animals.

As I got **Oslo International Rotary Club (OIRC) Scholarship**, it has relieved the burden of my ongoing academic expenses. which is a great help for me. I can't be more grateful for choosing me as a scholar of the Oslo International Rotary Club (OIRC)

**My career goal** is to do the best with my veterinary skill and knowledge that I will gain by the end of my academic year. I want to finish my higher study to acquire knowledge and learn more about veterinary medicine to help people and animals by giving medical care and guidance. I want to do research work on Public Health. I know the passion and the career goal I seek are possible only through veterinary science.
