

Progress Report of Sathi Rani Das

Dear OIRC Committee,

I hope you are well. I am writing to share my sincere appreciation for the scholarship support I received from the Oslo International Rotary Club (OIRC) in 2023. This assistance has made a meaningful difference in my educational journey and has encouraged me to continue working hard toward my academic goals.

I am currently pursuing a Master of Science (MS) in Agricultural Construction and Environmental Engineering at Sylhet Agricultural University, which I began in July 2025. My research focuses on the “Utilization of biochar derived from colocasia esculenta (taro) agro-waste for the removal of physicochemical contaminants from municipal wastewater.” The goal of this study is to explore sustainable, low-cost, and environmentally friendly approaches to wastewater treatment.

Earlier in 2025, I completed my Bachelor of Science in Agricultural Engineering and Technology from the same university with a CGPA of 3.857 out of 4.00, achieving distinction. This academic foundation has helped me smoothly transition into my postgraduate research work.

In recognition of my research potential, I was awarded the National Science and Technology (NST) Fellowship for 2026 by the Ministry of Science and Technology (MoST), Bangladesh. I also received a research scholarship from the Sylhet Agricultural University Research System (SAURES) in 2025, which further supports my ongoing work.

The OIRC scholarship has been an important source of encouragement and financial support throughout my studies. I am truly grateful for your trust and generosity. I remain dedicated to my academic development and hope to contribute positively to the agricultural sector through my future work.

With heartfelt thanks,

Sathi Rani Das

MS Student

Department of Agricultural Construction and Environmental Engineering

Sylhet Agricultural University, Bangladesh
